WHAT I DO

I build digital products end to end, database and AI layer through to the interface and the acquisition strategy. Over the past two years I have shipped an AI-powered SaaS platform, a custom CRM now running in production, an e-learning site and a conversational AI project, while running marketing for retail and tech companies. I can build the product and then market it.

Available for freelance work on AI integration into existing products, full-stack web applications (React / TypeScript / PostgreSQL), WordPress & WooCommerce builds, and growth and SEO for small teams.

SELECTED WORK

MEKOA. AI Veterinary Telemedicine Platform *June 2026 – Present*

Full-stack developer, two-person team

- End-to-end SaaS product: AI triage chat, appointment booking, live video consultation with real-time transcription, and an automatically generated clinical report.
- LLM integration in a real clinical workflow: eight configurable model roles, a second-pass verifier model to reduce hallucinations, and RAG over an ethology knowledge base and a drug database.
- Secure multi-tenant PostgreSQL schema with Row-Level Security and trigger-based defence in depth, backed by a versioned RLS test suite.
- 117 API endpoints and around 62 screens across four distinct user roles (owner, professional, clinic, admin).

React 18 · TypeScript · TailwindCSS · Hono · Supabase / PostgreSQL · Vercel AI SDK · LiveKit · Deepgram · Stripe · Vitest

Canexion. Marketing Director & Internal Tooling *Mar 2026 – Present*

Retail store, physical and e-commerce · Basque Country

- Built a fully functional custom CRM from scratch to run the store's loyalty programme, designed, developed and now in daily production use.
- Grew organic engagement by 33% and follower base by 5% across social channels.
- Own the full digital presence strategy across the physical store and the online shop.

Akademia eñe Online. Course Platform *Mar 2026 – Sep 2026*

Erasmus for Entrepreneurs · Bratislava / Donostia

- Built the web platform hosting the school's language online courses.
- WooCommerce-based LMS architecture; delivered remotely across two countries under Scrum/Agile.

Kahir. Conversational AI for Outdoor Sports *Jul 2024 – Jan 2025*

Personal project

- Route-sharing platform in the vein of Wikiloc, with user profiles, activity tracking and community features.
- Conversational AI layer with multi-turn context management, giving personalised route recommendations from user history, sport habits and live weather data.

PHP · JavaScript · HTML/CSS

Birakari — P2P Marketplace for Second-Hand Outdoor Gear *2025*

Founder · Euskadi, ran product, technology and go-to-market as sole founder. Project currently on hold.
